"Aspherical Optical System" (AOS) exclusively from HEINE eliminates corneal and iris reflexes to provide large, crisp and glare-free fundus images.

[01] Flat, elliptical illumination beam produced by HEINE's Aspherical Optical System. [02] Observation path.

[03] Redirected iris and corneal reflexes.

[04] The elliptical light beam enters through the lower half of the cornea. The illumination beam has been separated from the bservation beam (Gullstrand-Principle). All reflexes are diverted away from the observation beam due to the curvature of the reflective cornea. Due to the flatcompressed form of the light beam, amaximum amount of light enters through the pupil.

[05] Once past the anterior chamber, the light beam opens up dramatically to illuminate a large area of the retina.

Exclusive dustproof design protects the precision optical components and ensures maintenance-free operation. The BETA200/200S Ophthalmoscopes are the only instruments with an aluminium frame system. Optical components are flush-mounted on a cast aluminum frame, eliminating misalignment and making the instrument shock-resistant. The BETA 200 S LED has virtually unlimited hours of working life. No need to ever replace bulbs. Maintenance-free for a lifetime.

- : Exclusive aspherical optical system (AOS) for more information see the bottom of page 050.
- : HEINE has set a new standard which maintains that only the best is good enough, from the selection of materials to processing, from light intensity to dimmability, and from thermal management to a colour rendering index as high as possible. That's what we call LED in HEINE Quality - or LED^{HQ}.
- : Special optical interface to precisely integrate the LED illumination with the optical system to ensure bright, homogeneous light during examinations.
- : The BETA200 S Ophthalmoscope accommodates higher refractive errors with a 28 single lenses Rekoss Disc and features a 74 single step design on a non-continuous wheel avoiding extreme diopter jumps.

+ in 1 D steps: +1 through +38 D

- in 1 D steps: -1 through -36 D

- : Patented, unique, stepless dimming from 3 % to 100 % with practical one-finger operation.
- : No stray light due to the recessed, multi-coated viewing window eliminates distractions.
- : Precise one-hand control of the instrument. Ergonomic design offers flexibility while examining.
- : Suitable for large as well as small or undilated pupils.
- : Ergonomic design fits the orbita comfortably, and blocks out ambient light.
- : Full functionality of the BETA 200 S LED is guaranteed with BETA Rechargeable Handels and the EN100/EN200 Wall Transformers.

HEINE K180[®] Ophthalmoscope

Standard direct ophthalmoscope

A full-featured instrument at an economical price.

- : Precision spherical HEINE optics. Corneal and iris reflexes are eliminated.
- : XHL Xenon Halogen Technology. Bright, white light. Clear retinal image.
- : Range of lenses: 27 lenses from -35 D to +40 D. Brilliant image even at high corrections. 1

+ in 1 D steps: 1 – 10	15	20	40	D
– in 1 D steps: 1 – 10	15	20	25	35 D

- : Ergonomical shape. The instrument fits the orbita comfortably.
- : Soft orbital rest. Steadies the instrument and protects your glasses.
- : Choice of 5 apertures. For both large and small pupils. Choice of fixation star or cobalt blue filter for corneal examination.
- : Dust resistant housing. Maintenance-free.
- : High-impact polycarbonate housing for durability.

HEINE mini 3000[®] LED Ophthalmoscope

With LED illumination in HEINE Quality – LED^{HQ}

Modern ophthalmoscope with maintenance-free LED illumination. Its brightness and colour rendering are comparable with a HEINE XHL Xenon Halogen Ophthalmoscope.

- : Maintenance-free, no need to ever replace the LED.
- : LED Thermal management for a consistent light output throughout the whole working life.
- : HEINE has set a new standard which maintains that only the best is good enough, from the selection of materials to processing, from light intensity and thermal management to a colour rendering index as high as possible.
- That's what we call LED in HEINE Quality or $\mathsf{LED}^{\mathsf{HQ}}.$
- : Exclusive Battery Performance Indicator: When the instrument is switched on, the maximum light intensity is shown, then the light intensity is regulated down to the level that corresponds to the current charge status of the battery so you know when your batteries need changing.
- : Fade-Out Feature: brightness reduces slowly even with low residual capacity, for even more efficient use of dry or rechargeable batteries.
- : Operation time typ. 10 hours. The batteries need to be changed less often and the rechargeable batteries last longer.
- : For further technical specifications, please see mini3000 Ophthalmoscope with XHL illumination on page 059.

HEINE mini 3000[®] Ophthalmoscope

Compact Pocket Ophthalmoscope with XHL illumination

: 5 different apertures

: Dust resistant

Modern pocket ophthalmoscope with XHL Xenon Halogen bulb technology. Concentrated bright light for perfect illumination, a brilliant image and accurate colour rendering. Fixation star aperture with grey filter for reducing the light intensity. Excellent optics and best colour rendering in minimum dimensions, ideal for rounds and house calls. Can be used with the mini 3000 handle system. Available in black and blue.

- : HEINE optics produce crisp, clear images of the whole area under examination and minimise reflections.
- : 5 different apertures. A full-function instrument incl. fixation star.
- : Grey filter for light-sensitive patients.
- : Range of lenses: 18 lenses from -20D to +20D.
